Projects

SRV V.2: A RELIABLE SYSTEM FOR UNIVERSITY OF PANGASINAN COMMUNITY

PHP | JavaScript | MYSQL | Bootstrap | Visual Studio
Capstone Project: SY 2022-2023

- Provide a feedback mechanism for students and teachers to share their thoughts and suggestions. It can help identify areas of improvement and provide insights into how the system is being used.
- Give students access to view their survey questionnaire answers so they can identify their areas of difficulty, including personal, academic, and financial factors.
- Identify and expand the risk factors and issues that students may encounter, to better understand potential challenges and develop strategies to address them effectively.

I LOVE PANGASINAN WEB APPLICATION

REACTJS | MYSQL | PHP| Visual Studio
Application Development and Emerging Technologies: SY 2022-2023

- This Web application project aims to develop and design a website that showcases our province, province of Pangasinan.
- This project show's what are the best tourist attraction like beaches, Island nature and adventure, famous food and the hospitality of the people in Pangasinan also it shows the rich culture of Pangasinan like festivals and famous events and also hotel and restaurant. Also, user can ask question to the admin by sending a message and contact number.

COVID-19 PREVENTION ANDROID APPLICATION

Kotlin | Android Studio
**Object Oriented Programming: SY 2021-2022**

- To help people understand what COVID-19 really is. In our project, it will help people so that they know how to treat COVID-19 disease and how to prevent it. The user will also know how many are affected and deaths in the Philippines. And also, in this application the user will know the hospitals and doctor's that accept COVID-19 patients. And Videos related to COVID-19 disease and other related trivia about COVID-19 disease.
